

CMPT 276 Project Group 8 Team Contract

Communication:

Our team will communicate primarily through WhatsApp for daily discussions, idea sharing, and quick updates. Important decisions and summaries will be discussed in person or during meetings to ensure transparency. For urgent matters, members may contact each other via message, and all members are expected to check WhatsApp at least once per day by reacting to the text or replying.

Meetings:

Meetings will be scheduled based on members' availability, with at least one official meeting per week (online via Zoom/Google Meet or in-person). Additional meetings will be arranged before major deadlines when necessary.

Task Distribution:

The workload will be divided into manageable tasks, and members may voluntarily assign tasks based on preference and availability. Contributions will be tracked through task completion and GitHub activity. No member should consistently carry a disproportionate workload, and any imbalance or difficulty will be discussed openly and redistribute tasks.

Internal Deadlines:

Internal deadlines will be set at least 2-3 days before official deadlines (depending on workload size) to allow time for review, revision, debugging, and full team agreement. Work should not be left until the last minute.

Problem Handling:

Repeated lack of responsibility may negatively impact peer evaluations. If a member is not contributing, the team will first address the issue privately, if the issue continues, it will be discussed collectively and tasks may be reassigned. If a member misses a deadline, they must inform the team as soon as possible with an explanation, and tasks will be reassigned if necessary.

Commitment:

All members commit to contributing actively and consistently to all phases of the project (design, coding, testing, and reporting), communicating respectfully, responding to team members, and completing assigned tasks before internal deadlines.

Signatures: By signing below, we agree to follow this contract and accept peer review outcomes.
